

SANTA CRUZ COUNTY BATTERY RECYCLING

You can now add old batteries to the list of things you can just take back to the store when it's time to get rid of them. Batteries can't go in the trash or recycling, but there are now lots of convenient places to drop them off, and it's absolutely free! All types of household batteries are accepted, including rechargeables, hearing aid batteries, lithium and any kind of small dry cell battery. For the nearest drop-off location, consult the list below. For more information contact County Recycling at (831) 454-2160.
