

SANTA CRUZ COUNTY BATTERY RECYCLING

If you have curbside service with GreenWaste Recovery, you may place all of your used batteries in a clear plastic bag, and place *on top of your blue recycle cart* on your normal day of collection, and they will take them for you. If you don't have curbside service, you can now add old batteries to the list of things you can just take back to the store when it's time to get rid of them. Batteries can't go into the trash, or directly into your recycling bin/cart, but there are now many convenient places to drop them off, and it's absolutely free! All types of household batteries are accepted, including rechargeables, hearing aid batteries, lithium and any kind of small dry cell battery. For the nearest drop-off location, consult the list below. For more information contact County Recycling and Solid Waste Services at (831) 454-2160.
